## Chapter 7 Summary

### Overview of Messi's Early Health Concerns

On January 31, 1997, Doctor Diego Schwarsztein met a nine-and-a-half-year-old Lionel Messi, who was brought in by his parents due to concerns about his limited growth. At that time, Messi measured only 1.27m and had not yet made a name for himself in football, playing only junior-level matches.

### Diagnosis of Growth Hormone Deficiency

After a thorough examination and numerous tests, Doctor Schwarsztein diagnosed Messi with growth hormone deficiency, a rare condition affecting one in every 20 million children. The doctor explained this condition is analogous to diabetes but is not hereditary, as evidenced by Messi's taller siblings.

## **Treatment and Its Implications**

Once identified, Messi began a stringent growth hormone treatment regimen, requiring daily injections for up to six years. Doctor Schwarsztein clarified that this treatment was a well-established practice, not an experimental trial. The key to evaluating the effectiveness of the treatment was regular X-rays to monitor bone development.

## **Controversy Surrounding Growth Hormone Treatments**

Despite the clarity regarding Messi's need for treatment, there were controversies about the use of growth hormones in sports. When used by healthy adults, growth hormones might be misused as anabolic steroids, raising health risks and ethical concerns.

## **Challenges Faced by the Messi Family**

Though Messi's family received some support from social security and local clubs, financial barriers persisted. The Messis ultimately sought options outside Argentina for continued treatment, as Barcelona agreed to cover the

expenses—creating a connection that would alter Messi's future in football.

## Public Misunderstanding of Growth Treatments

The publicity surrounding Messi's treatment led to misconceptions, with many parents wrongly believing that the hormone therapy could be a solution for all children with growth concerns. Doctor Schwarsztein warned that such treatment is inappropriate for children without hormone deficiencies, stressing the importance of targeting real medical needs rather than misconceptions bred by fame.

In conclusion, Messi's journey with growth hormone deficiency illustrates both the medical challenges he faced and the broader social implications of his condition. The treatment he received was critical for his development, allowing him to grow to his genetically intended height, which has played a pivotal role in his extraordinary football career.

# Chapter 10 Summary : 10: Latigazo

## Chapter 10: Latigazo

### Conversation with Fernando 'Chiche' Niembro

Fernando Niembro, a Fox TV commentator, discusses Lionel Messi's transition from Argentina to Spain. He highlights that Messi left for Europe at a young age without significant recognition, and he believes that the recruitment of young South American talents by European clubs often leads to a talent drain that negatively impacts local leagues.

### Assessment of Messi

Niembro describes Messi as a "latigazo" or "lash," signifying his ability to decisively change a game with a single move. While there are many good players, Messi's capacity to electrify the crowd is unmatched. However, Niembro emphasizes that Messi must learn to cooperate more with teammates, share the ball, and adapt to playing as part of a unit rather than making plays solely for personal glory.

## Marketing and Game Performance

Niembro also advises Messi to be cautious of the implications of marketing, suggesting that he should focus on performing well in games rather than worrying about his marketability.

## Comparison with Maradona

The inevitable comparison between Messi and Diego Maradona is discussed. While Niembro acknowledges similarities in their playing styles, he notes that modern football presents more challenges than it did in Maradona's time. He believes that it is unfair to directly compare the two until Messi's career concludes. Niembro expresses hope that Messi will surpass Maradona, which would benefit Argentine football, yet insists Messi must first lead his team to a World Cup victory.

## Future Predictions

Looking ahead, Niembro finds it challenging to predict the future in an ever-evolving football world, emphasizing the rapid changes within the sport.

first significant setback in his young career.

## Injuries and Rehabilitation

Following the fracture, Messi undergoes treatment that includes a splint and a plaster cast, followed by rehabilitation, keeping him out of the game until June. A subsequent injury from a fall leaves him sidelined for three weeks. On a health note, doctors determine that Messi can gradually reduce his growth hormone treatment, though he will need daily injections for a few more years.

## Family Adjustments

While Messi struggles with adaptation to his new life, his family faces their own challenges. His sister struggles to acclimate, leading to a decision where the family must split: Jorge and Leo remains in Barcelona, while the rest return to Argentina. Messi expresses a strong desire to succeed at Barcelona.

recognition of individual merit over the year's accomplishments, blending both the FIFA World Player of the Year award and the Ballon d'Or.

## Reactions to the Result

Despite being the youngest player to win a second Ballon d'Or at 23, Messi's victory raises eyebrows. Iniesta and Xavi express admiration and acceptance of the outcome, although disappointment lingers among the Spanish contingent due to the lack of recognition for their World Cup-winning efforts. The media and public debate ensue, with many in Spain criticizing FIFA's decision, feeling it undermines their World Cup success.

## Global Responses

International reactions are mixed; while some applaud Messi's accolades, others argue he didn't deserve recognition over players involved in the World Cup. Critics from Italy and France assert that Messi's achievements in the absence of titles during that year diminish his merit. Despite this, support for Messi remains strong, with sentiments from figures like Guardiola and Maradona emphasizing his
